

Who's Hungry?

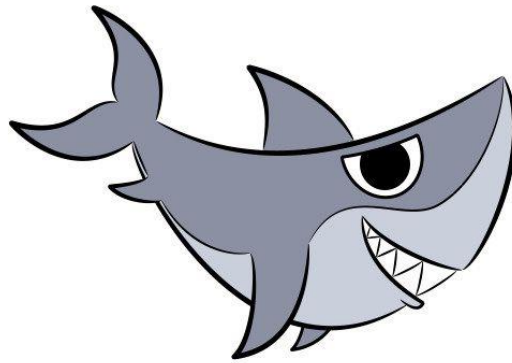

To make a food web you draw arrows pointing to the animal who eats them.

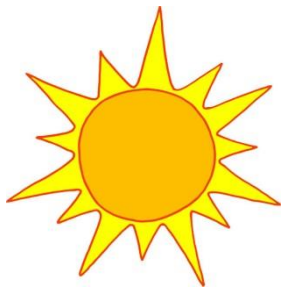

Can you make a food web from the animals below?

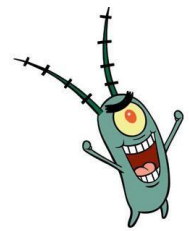

Seagull

Shark

Sun

Plankton

Fish

Seaweed

Who's Hungry

Can you match the description to the animal? Draw lines to connect the answers.

I am the Apex Predator at the top of the food chain	Sun
I am a plant that turns sunlight into energy	Fish
I was once in the food chain but now extinct	Seaweed
I am a predator but get eaten by bigger predators	Shark
I am in every food web	Megalodon

Circle which is correct **MORE** or **LESS** in the below

If Fish became extinct would there be **MORE** or **LESS** food for Sharks?

If Seagulls became extinct would there be **MORE** or **LESS** food for Sharks?

If Fish eat plastic instead of Plankton would there be **MORE** or **LESS** food for Sharks?

Who's Hungry?

Draw your own Food Web from either, the rainforest, the desert, an ocean, the Arctic or woodlands.

Remember every Food Web needs Sun, Plants and an Apex Predator
